1962/63

A LIBRARY IS FOR SERVICE. . . . .

A library is not a storehouse or a museum; it is not just a quiet place to wait out a rainy afternoon. A library is an agency meant for service, and in 1962/63 the University of Tennessee libraries served more people more times than ever before.

In Knoxville, personal book use rose more than 25 per cent. In Memphis, circulation of books increased from 80,216 volumes last year to 134,246; and at Martin, book use went from 26,862 volumes to 34,721. Interlibrary loans for the state-wide system last year totaled 3,407 volumes borrowed or lent; in 1962/63 there were 7,134 books lent to other libraries and 1,458 borrowed from other libraries.

Although it is true that more people are coming to school now than ever before, library use at Tennessee seems to imply more than merely a reflection of increased enrollment, which was the reason for the last substantial rise in book circulation.

This was in the school year of 1945/46. The regular-session enrollment at Knoxville rose 132 per cent (from 2,237 to 5,202). The librarian's report for that same period announced a 52.4% increase in the circulation of books. The following year, enrollment and circulation rose 60% and 77% respectively. These were, of course, the famous first years of the GI Bill, and the rise in library use was directly traceable to the rise in enrollment, which in Knoxville went from 2,237 to 8,405 in two years.* Book use reached a peak (237,627) in 1948/49, then declined for the next five years.

An upward trend began in 1954/55, slight until a sudden jump in 1959/60, the year the Undergraduate Library opened. Investigation showed that, unlike in 1946, it was more use per student, rather than use by more students, which was responsible for the increased book use (from 199,870 to 253,378). Since 1958/59, book circulation has risen 100%, from 199,870 to 400,131. Enrollment**increased 23% over the same period of time. The chart following indicates how far, percentagewise, the circulation of books has risen above enrollment.

---

**Fall quarter, Knoxville residence only. From a communication, "University of Tennessee Enrollments," by Truman Pouncey, Dean of Admissions and Records. Dated December 1, 1962.

A LIBRARY IS FOR SERVICE

A library is not a storehouse or a museum; it is not just a quiet place to wait out a rainy afternoon. A library is an agency meant for service, and in 1952/53 the University of Tennessee Libraries served more people more times than ever before.

In Knoxville, personal book use rose more than 45 per cent. In Memphis, circulation of books increased from 80,718 volumes last year to 139,[illegible] and at Martin, book use went from 26,862 volumes to 34,[illegible]. Interlibrary loans for the state-wide system last year totaled 3,807 volumes borrowed or lent; in 1952/53 there were 7,[illegible] books lent to other libraries and 1,938 borrowed from other libraries.

Although it is true that more people are coming to school from than ever before, library use at Tennessee seems to imply more than merely a reflection of increased enrollment, which was the reason for the last substantial rise in book circulation.

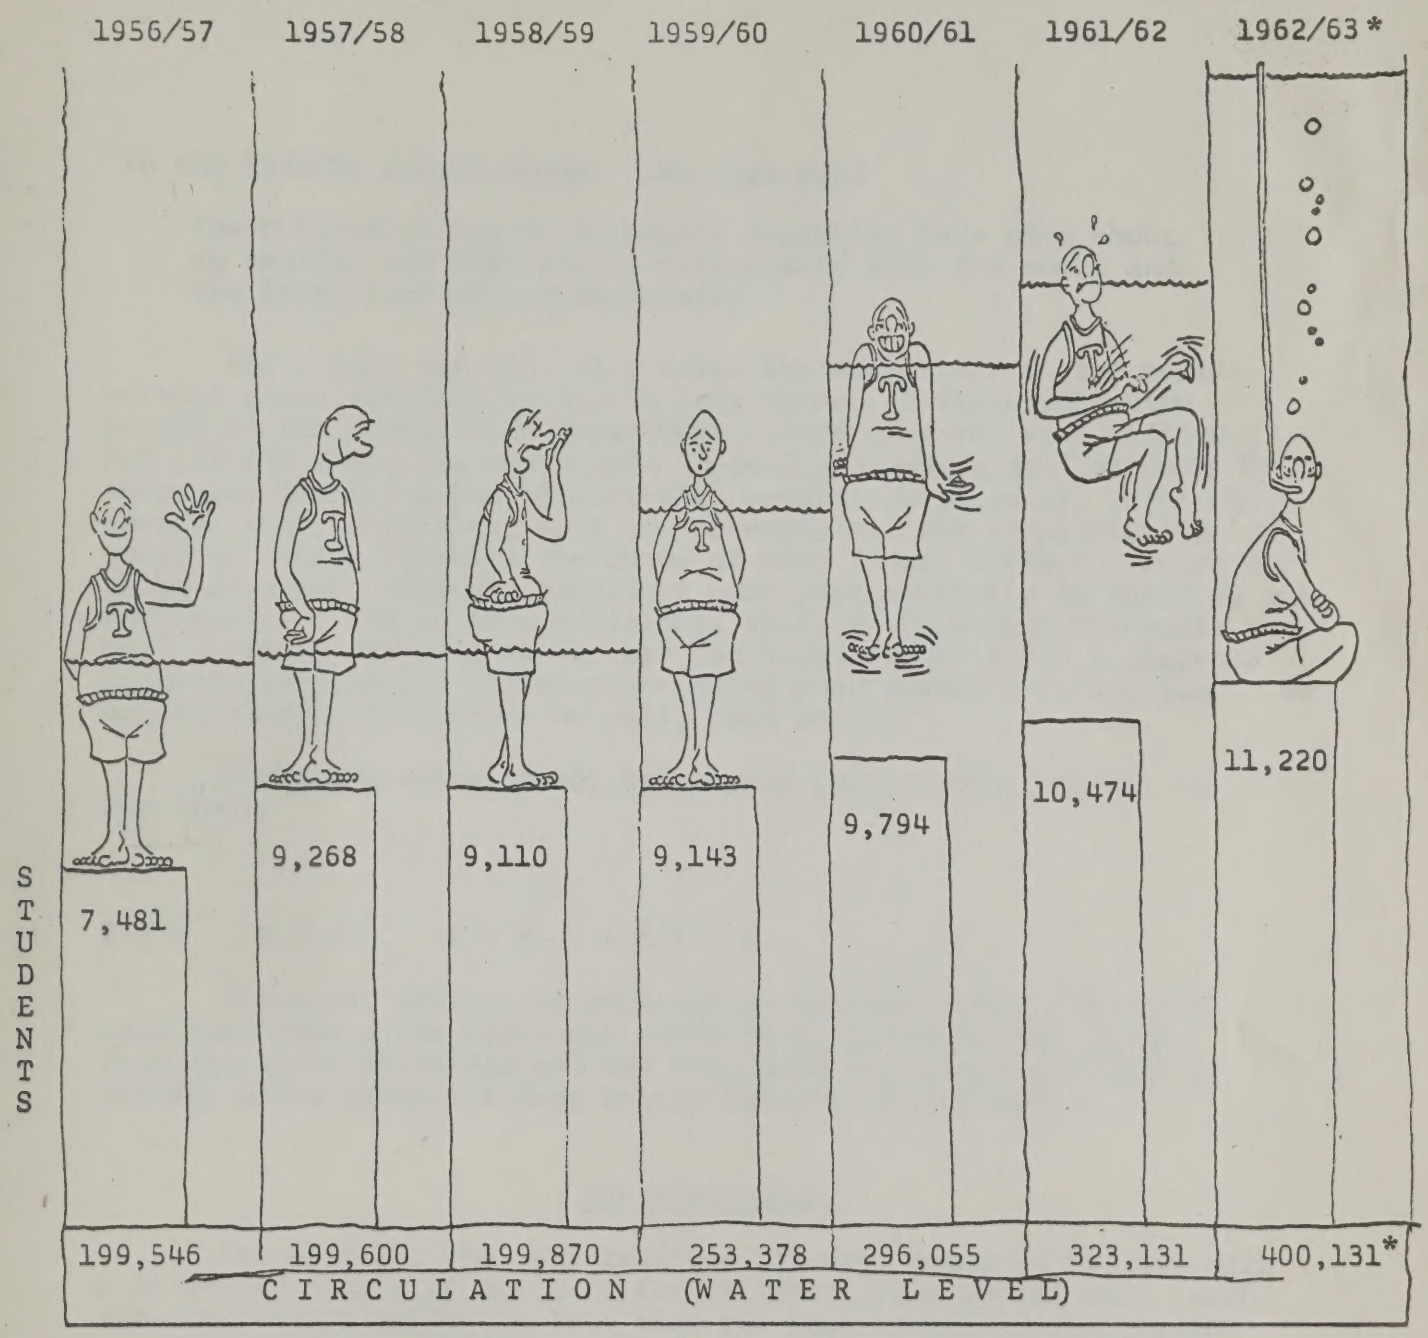
This was in the school year of 1949/50. The regular-session enrollment at Knoxville rose 127 per cent from 4,[illegible] to 7,[illegible]. The library's report for that same period estimated a 53% increase in the circulation of books. The following year, enrollment and circulation rose 90% and 77% respectively. These were, of course, the famous first years of the GI Bill, and the rise in library use was directly traceable to the rise in enrollment. While in Knoxville went from 3,297 to 5,[illegible], as far as [illegible] Book use reached a peak (251,[illegible]) in 1950/51, and declined for the next five years.

An upward trend began in 1955/56, right [illegible] a sudden jump in 1959/60, the year the Undergraduate Library opened. Investigation showed that, unlike in 1946, it was more use per student, rather than use by more students, which was responsible for the increase. Book use (from 189,870 to 253,[illegible]) since 1957/58, Book circulation has risen 100%, from 189,870 to 380,[illegible]. Enrollment increased 138% over the same period of time. The chart following indicates how far, proportionately, the circulation of books has risen above enrollment.

---

* THE UNIVERSITY OF TENNESSEE RECORD, Vol. 44, No. 3, May 1958; Vol. 50, No. 3, May 1957.

**Fall quarter, Knoxville residence only. From a communication, "University of Tennessee Enrollments," by Thomas Pomeroy, Dean of Admissions and Records, Dated December 1, 1952.



Library use is an actuality in the schedule of today's student. (This was not always so, of course: Many an alumnus upon a Homecoming visit, finding himself unaccountably in the library, brings forth one of the [alas] stock Old-Grad gambits: "I don't believe I was ever in the library before," which is supposed to be quite funny. It isn't, but in his case it may very well be true.) Faculty insistence upon use of library materials is one reason. Another, to quote the Librarian at Yale, is that ". . . the undergraduate is a more serious student than formerly."** This is a nationwide trend, and we made note of it

*Adjusted. See Table, "Comparison of Personal-Use Circulation," in Appendix.

**"Report of the Librarian," BULLETIN OF YALE UNIVERSITY, Series 59, No. 13. 1 July 1963.

in the 1960/61 Annual Report. We also said

> Few observable trends in higher education have come about so rapidly and affected so universally both the small and the large college and university.

Heavy book use generally calls for more staff in the public service areas (in 1946 we poured help there: fifteen full-time people in the Circulation Department, where only one year earlier had labored six), but our people in Public Services are handling the increased traffic quite effectively, possibly because of, initially, careful staff selection, plus low turnover and the simplification of routines which followed the chaos of 1946 (three different cards or slips in three separate locations were once necessary in charging out one book). We do need additional staff in Technical Processes to buy, catalog, and prepare for use the books required for a vigorous graduate program and a library-oriented undergraduate curriculum. We do, as always and forever we will, need books.

But the greatest need, the crying need at this moment, is for space.

THE NEED FOR SPACE . . . . . .

Projected notions of adequacy in library facilities which were made even a few years ago are completely unrealistic today. They should be discarded and new ones evolved, before the lack of library space becomes a drag on the University's progress.

Space for Books

For example, the Undergraduate Library, occupied in 1959 with a projected future of adequacy for at least eight years, will reach total working capacity in less than two more years, if the present rate of additions prevails. UGL's net gain in 1962/63 was 5,053 volumes, making a total of 31,824 books on shelves scheduled to hold 40,000 at full capacity.

Book space in the branches is critical, too. Sometimes the only way we can add new titles to a branch library is to remove some of the old ones, as we regularly do at Engineering, even though they may not yet be obsolete or ready for storage. This happens at Agriculture, too, and at Biology, though the latter will be relieved, to an extent, when its new quarters are ready.

The Law Library is crying for the stack space we have been using these many years for the overflow from Main and the branches. All books and materials from Main which were stored in the Law stacks are now back at Main, but there is still so much material from the branches that new Law additions have no place to go. This space has been a godsend for the past ten or more years, and now that Law wants it, needs it, the Law Library should have no cause to regret its generosity.

In the Main Library stacks, book space has run out on the third level, where are housed the collections in history, philosophy and religion, documents, etc. Shifts are being made to the basement level, the least attractive and most utilitarian of the three reader-book areas.

The Main Library stacks will, within the next two years, reach a condition which will force us, unwillingly, to face the decision as to which is less objectionable: to encroach upon the space for readers so arduously come by; or to sacrifice the comfort effectiveness, and convenience of the six foot-centered stacks. We do not want to do either of these things, but we cannot place shelving around the walls, because wall space is taken up by the carrels, even now in short supply. When the time comes that we must make a move, we will more than likely choose to narrow the aisles and crowd the levels, with all the disadvantages and discomforts this answer will loose. The aspect of flexibility was kept in mind and adhered to strenuously when the new addition was built, and the luminous ceilings in Undergraduate, Special Collections, and on the main level make for truly flexible arrangements. Channel lighting, however, was installed on the third and ground floors, and it will be no small job to arrange the shelves for the maximum illumination. Nevertheless, difficult or not, we would rather tackle the problem of physical rearrangement, with all its headaches, than lose another reader station.

Space for Readers

> In general, the seating capacity of a new building should be based on the anticipated growth over a twenty-year period. Accommodations for at least one-third of the student body will be essential. The changing concept of the role of the library . . . may make necessary an upward revision of this figure. . . .*

*"ALA Standards for College Libraries," COLLEGE AND RESEARCH LIBRARIES, July 1959, Vol. 20, pp. 274-80.

This is what the American Library Association said in 1959. In 1963, library building planners and consultants agree with educators that "one-third of the student body" is now a minimum; they hesitate to recommend anything which falls much below 40%, and many of them hold out for 50% of the student enrollment finding seats in the library at a given time.

The University of Tennessee libraries at Knoxville can seat 16.7% of the Fall '62 enrollment. This is 1.0% less than we could seat last year. If published enrollment predictions come true (18,000 in the Fall of 1964), next year we will be able to seat slightly more than 10 per cent.

This is an alarming portent. There is no indication that the students will fall away from library use. A combination of causes sends the student to the library, among them the growing emphasis on the library as a teaching instrument; the higher standards for matriculation which admit the more serious student only; the lack of study space elsewhere on the campus. This last is a tremendous factor in the increase of library use, but those who crowd the library day after day and night after night are using library resources, as the great rise in book circulation proves.

A tenet once held by librarians--the person sitting at a library table should be using library materials--is giving way, at least it is at Tennessee, to the knowledge that the student has to have some place to go to get his studying done, whatever material he is studying from. A stroll through the Undergraduate Library, the student lounge, the card catalog hall, the Reference Room, the corridors, will reveal the extent to which reader stations are used in the Main Library. They, like the hotel rooms in wartime Washington, hardly have time to cool off.

In the main stacks, there are 141 carrels and 7 studies for graduate students and research workers. Tennessee's growing graduate school, presently one of the three largest in the South, had 2,080 students enrolled in the Fall of 1962. Carrels are assigned only to those who are actually writing a thesis (or doing work which their professor deems comparable). Most carrel assignments are divided between two people, some among three.

Conditions in the branch libraries are much worse. There undergraduates vie with graduate and research workers for the sparse seating, and there, for the greater part, seat space is lacking. At the Science Library, one table and eight chairs from the reading room were lost when Chemistry had to reclaim the library's workroom. The Biology Library, in its new quarters, will have 50 seats in comparison with the 23 presently offered. This is a terribly small number with which to serve the students in the biological sciences.

Students who enroll to do graduate or research work in an institution expect, and rightly, the provision of study and work facilities in the library as well as in the laboratory.

By the same token, undergraduates "should find their needs amply provided for in carefully chosen collections of basic works in all the disciplines of the college curriculum, a well-stocked reference section, and a liberal provision of recreational reading."*

A new, separately housed undergraduate library is sorely needed. This accomplished, there will be available in the Main Library approximately 10,000 square feet for general library expansion. Plans for this eventuality should be going forward at this moment, before the lack of space for readers and library service causes a slowdown in the University's "march toward greatness."

UT/ARL

Membership in the Association of Research Libraries is by invitation only and is limited to libraries of institutions devoted to and actively engaged in comprehensive, growing research programs and graduate study at the doctoral level. It is the principal organization of the major research libraries and is concerned with all problems confronting research libraries and with the improvement of the scholarly resources of the country. The University of Tennessee is fortunate to have been invited to join ARL, but acceptance poses vulnerability, for the members are strong and tough, and it takes some serious effort to keep up with them. Tables in the Appendix show the relative standings in certain categories of the academic members of ARL. It will be noted that Tennessee is well below the median figure in all breakdowns save one--the per cent of total library expenditures spent for books, periodicals and binding. We stand in 38th place in the amount we spend for books (out of 63 institutions), but we are in 18th place in percentage (39.46) spent. The median in this category is 34.53 per cent.

O P E R A T I N G

This means we are spending a very small part of our budget on operating, funds which are not adequate at the present time for expenses which grow year by year. We cannot cut down on books, periodicals, and binding, nor on salaries. It is quite apparent that additional money for operating expenses must be added to the existing budget.

---

*"The Problem of Library Special Collections," by Thomas H. English (Professor of English at Emory University), a paper presented to the Librarians' Group of the University Center in Georgia at Emory University, November 16, 1962, and published in SOUTHEASTERN LIBRARIAN, Fall Issue, 1963.

Librarians are notoriously prone to "make do" with what is at hand. Even libraries with holdings and staff which are complementary to the program may skimp on supplies and struggle with outmoded, makeshift equipment which eats up staff hours and produces, at best, shoddy results. The amount we spend for "Other Operating (supplies, equipment, telephone, travel, maintenance and repair, postage and express) has risen in the last ten years from $7,745 to $22,511, with the greatest increase in the category of communications--telephone and postage. We have, other than replacements, bought very little new equipment over the years. Last year, however, we overcame our native caution and hired two Xerox copiers, bought microprint reader-printers, a postage meter, an offset duplicator, a heavy-duty stapler, and a turnstile, plus the more ordinary equipment, as shelving, desks, file cabinets, card catalog cases, chairs, typewriters, and light fixtures.

Xerox is paying its way: the machines (one in Main, one in Science) cost, through June 30, $3,236; they took in, during that same period, $3,689. These copiers are fantastically easy to use, and their product is generally so clean and clear that a student who might be tempted to tear a page out of a book or bound volume (it has happened, I am sorry to say), or walk out with the volume under his shirt, would rather spend a dime or two to have the passage copied than run the risk of being caught mutilating or attempting to steal state property. We expect our losses from pilfering will be reduced, because of the turnstile, of course, and in great measure because of the Xerox.

The Science Library uses its machine to copy the tables of contents of the various journals, which eliminates the necessity of routing the periodical itself to faculty who may not be interested in the articles in that particular issue.

The Filmac 100 Reader-Printer makes hard, or paper, copies from transparent film (microfilm on rolls, microfiche), which is of much benefit to scholars who must rely on microform items in their research. With the Filmac they can make an eye-legible print of their material, thus eliminating laborious copying from the micro-image. (This machine is a reader in itself; the printer is not obligatory, but can be used whenever desired.)

These examples of time- and work-saving equipment which libraries hesitate to order (or, in all fairness, seldom have the money to order) are in the forefront of the approach to automation. Automation is a factor in everybody's future, libraries most certainly included, and we should try not to back away from it or fall behind in the use of new and effective machines with their accuracy, speed, and economy, particularly when staff is so hard to get and to keep, particularly the staff for routine and clerical jobs.

THE BOOK COLLECTION

In the ARL breakdown Expenditures for Books, Binding and Periodicals, Tennessee is thirty-eighth with $307,393.00, as compared to $252,617 last year (thirty-ninth). Next year's book budget for Knoxville stands at $300,000, which represents budgeted funds only, does not include anticipated gifts nor the book budgets of Memphis, Martin, and Extension. We are grateful for this administrative and state support, indicating as it does a growing concern for and interest in library holdings.

A total of 38,623 volumes were added to the collections, compared to 35,648 last year. Memphis added 1,910, or 257 more than last year. Martin's total added was 2,706 for 1962/63.

Some of the outstanding materials secured by Knoxville last year are listed below:

Modern Languages and Literature

Camus, Albert
Oeuvres complètes. André Souret, éditeur. Paris, Imprimerie Nationale, 1962-6 volumes.

Godfrey, Thomas
Juvenile poems on various subjects. With the prince of Parthia, a tragedy...Philadelphia, Printed by Henry Miller, 1765.

Holinshed, Raphael
...The...Chronicles of England, Scotlande, and Irelande... London, Imprinted for I. Harrison [1577] 2 volumes.

Of great interest to our Shakespeare scholars and considered indispensable to the teaching of graduate Shakespeare courses.

Pforzheimer, Carl Howard
The Carl H. Pforzheimer library, English literature, 1475-1700. New York. Privately printed. [The Morrill Press]. 1940. 3 volumes.

Pypin, Aleksandr Nikolaevich
Istoriia russkoi literatury... 1902-03. 4 volumes.

A significant addition to our Russian Literature collection.

Valery, Paul
Cahiers. Paris, Centre national de la recherche scientifique. 1957.

Three centuries of English and American plays: Elizabethan, Shakespeare, Jacobean, 1516-1641 [Microprint].

Philosophy

Bayle, Pierre
Oeuvres diverses de Mr. Pierre Bayle... A la Hoye Chez P. Husson, T. Johnson, etc. 4 volumes.

Bentham, Jeremy
The works of Jeremy Bentham. New York. Russell and Russell. 11 volumes.

Fine Arts

Campbell, Colin
Vitruvius britannicus; or, The British architect... London, the author, 1717-71. 5 volumes.

Containing the plans, elevations and sections of the regular buildings, both public and private in Great Britain.

Denkmäler des Theaters...Wien, W. Krieg, 1926. 12 volumes.

Popularly known as the Monumenta Scenica. Consists of twelve portfolios, each with several score matted plates, each portfolio covering a specific aspect of theatre.

Revue belge d'archéologie et d'histoire de l'art...Bruxelles et Paris, Librarie national d'art et d'histoire [1931]. Volume 1-27, 1931-1958.

Ridolfi, Carlo
Le maraviglie dell 'arte...Venetia, G. B. Sgaua, 1648. 2 volumes.

Verve; an artistic and literary quarterly...Paris [Imprimerie des beaux-arts. 1937-]

Various volumes toward the completion of our file including no. 33/34 (La Bible by Chagall) and no. 37/38 (Dessins pour la Bible by Chagall)

Bibliographies

Medina, José Toribio
Biblioteca hispanoamericana, 1493-1810...Santiago de Chile, Fondo Historico y Bibliográfico José Toribio Medina, 1958-1962. 7 volumes.

New York. Public Library. Slavonic Division.
Dictionary catalog of the Slavonic collection... Boston, G. K. Hall, 1959. 26 volumes.

Pan American Union. Columbus Memorial Library.
Index to Latin American Periodical Literature, 1929-1960...Boston, G. K. Hall, 1962, 8 volumes.

Bibliographies (continued)

Pohler, Johann
Biblioteca historico-militaris...Leipzig, Lang, 1889-99. 4 volumes.

Reuss, Jeremias David
Repertorium commentationum societatibus litterariis editorum. Gottingae, apud Henricum Dieterich, 1801-21 (Reprint) 16 volumes.

Precedes the Royal Society of Catalogue of Scientific Papers and is valuable index to publications of the learned societies of various countries from the time of the founding of each society to 1800.

Others

Archives of Maryland, V. 1-67, 1883-1954.

Cartesao, Armando
Portugaliae monumenta cartographica... Lisboa, 1960 - (Comemoracoes do v centenário de morte de Infante D. Henrique) 4 volumes.

A collection of Portuguese charts and maps with accompanying text including the earliest known as well as those of the 16th and 17th centuries. The volumes contain a wealth and variety of cartographic specimens whose historical and scientific value and interest are unexcelled.

Fortescue, Sir John William
History of the British Army... London, Macmillan and Co., Limited, 1910-1930. 13 volumes in 14.

-----. Maps and plans illustrating Fortescue's History of the British Army...London, Macmillan and Co., Limited, 1915-1930. 6 volumes.

Haywood, John
Manual of the laws of North Carolina, arranged under distinct heads in alphabetical order...2nd ed. Raleigh, 1808. 2 volumes bound in one.

Added because of our interest in John Haywood and because of the early historical relationship between North Carolina and Tennessee.

Germany. Reichstag. Verhandlungen des Reichstags, V. 326-458 (1919-33) [Microcard].

Great Britain Privy Council
Acts of the Privy Council of England. V. I-XLIII (1542-1628) [Microcard]

Michaux, Francois Andre
Travels to the westward of the Allegany Mountains in the states of Ohio, Kentucky and Tennessee, and return to Charlestown, through the upper Carolinas. London, J. Mawman, 1805.

The much-sought-after Mawman (350 p.) edition of this basic volume of early travels in the southern states; essential, along with less complete editions, to collections of Tennesseana.

G I F T S

The third year in the cause of library development found $23,000 added to the book income and about five thousand books and special materials added to the collections. Under the joint superintendence of the Director of Libraries and the Program Coordinator, John C. Hodges, the Library Development Program, though still very much in its infancy, is showing signs of becoming a source of appreciable income for book buying. Totals since its beginning in the fall of 1959 are $58,391 in cash and 18,595 books, manuscripts, and other special items.

From January 1962 through June 1963, outstanding cash donations were made by the Department of Romance Languages ($5,000); Jesse D. Levy, Class of 1913 ($1,000); and one thousand dollars each from the Better English Fund, the Hamilton National Bank, White Stores, Inc., and John C. Hodges. The Tennessee Eastman Company, in what they termed "partial repayment" for the cooperation the University and its libraries have shown the Company, gave $3,000 to buy library materials "for science and research."

Among titles purchased with gifts are such substantial additions as Holinshed's Chronicles; Oeuvres diverses de Mr. Pierre Bayle, 4 volumes; The works of Jeremy Bentham; Vitruvius britannicus, or The British architect, 5 volumes; Index to Latin American periodical literature, 1929-1960; Biblioteca historico-militaris, 4 volumes; Biblioteca hispanomericana, 1493-1810, 7 volumes, by José Toribio Medina; and others.

Gifts to the Special Collections Library included the very desirable manuscript collections cited below:

Brownlow, William Gannaway, 1805-1877.
Tennessee governor, journalist, clergyman.
Papers, 1831-1877. 25 pieces. Includes correspondence, addresses, and governor's messages. Gift of Mrs. Edward Ashe.

Hooper, Ben W., 1870-1857.
Tennessee lawyer, governor, 1911-1916; member of United States Labor Board, 1921-1926. Additional papers, 1943-1955. ca. 500 pieces. Correspondence, clippings, photographs, etc. Gift of Mr. Lemuel Hooper.

Hoskins, James D.
Educator, President of University of Tennessee, 1934-1946.
Papers. ca. 7,500 pieces. Correspondence and related material pertaining to the University. Includes also many of the papers of Presidents H. A. Morgan, Charles Dabney, and Brown Ayres.

Krutch, Joseph Wood. Author and critic. Born, Knoxville, Tennessee, now of Arizona. More Lives Than One. Two drafts of the autobiography. Typescripts showing changes and corrections. Gift of Mr. Krutch.

Mitchell family.
Prominent early residents of Washington County, Tennessee
Papers, 1778-1950. ca. 250 pieces. Mostly relating to Washington County, Tennessee. Includes deeds, wills, letters, land grants, charts, and miscellaneous legal documents. Scattered through the collection are such names as John Sevier, Samuel Doak, and Elihu Embree. Contains much material concerning the early settlement of Brownsborough. Gift of Mr. Thomas Pyle.

Thaler, Alwin.
Retired University of Tennessee Professor. Author, renowned Shakespearean scholar.
Literary manuscripts. Related correspondence, typescripts, galley proofs, etc. ca. 1500 pieces. Gift of Dr. Thaler.

S T A F F A C T I V I T I E S

The total staff once again maintained and awarded the Mary E. Baker Scholarship to a nonprofessional staff member, this year to Miss Colene Siler, Undergraduate Library assistant, Reserve Book Room.

Number 15 in the Library Lecture Series was delivered on March 26 by Dr. William S. Dix, Librarian, Princeton University. His paper, "The International Role of the University Library," was published in the fifth volume of library lectures, along with Lecture 13, "The Growing Giant: The Science-Technology Library," by Dorothy M. Crosland, and Lecture 14, "The University Library in Violent Transition," by Ralph E. Ellsworth. Miss Ann Mitchell, Assistant Reference Librarian, edited the volume, which was published by the UT Press.

Betty K. Adams, Agricultural Librarian, and John Dobson, Special Collections Librarian, co-edited THE TENNESSEE LIBRARIAN, the journal of the Tennessee Library Association. Gene M. Abel, Administrative Assistant, was the business manager of the journal.

Emmett McGeever resigned as Science Librarian to become Head of Reference, Science and Technology Division of the Library of Congress. Don Jett, Assistant Reference Librarian, was appointed to succeed Mr. McGeever in the Science Library.

Thomas T. Rogero, Cataloger, was transferred to the post of Engineering Library. From April 25 until August 19 Mr. Rogero supervised both Engineering and Science, while Mr. Jett finished his library school work at Florida State University.

The Director was asked to assist several colleges and schools in planning libraries, either new, remodeled or expanded. Among them were Dickinson College, Carlisle, Pa.; Medical College of Virginia; Dade County Junior College in Miami; Berea and Western Kentucky State College; Belmont College in Nashville; the Oral Roberts University in Tulsa. The University of Concepción in Chile and Western College for Women in Oxford, Ohio, called upon him for assistance a second time, as did Coker College in Hartsville, South Carolina, and Charlotte College, North Carolina.

In connection with his interest in library buildings and architecture, he was elected to the Buildings Committee for College and University Libraries, Library Administration Division. The Association of Research Libraries made him its representative to the American Standards Association as chairman of Committee Z85 on Library Equipment and Supplies.

He continued as a member of the Council on Library Resources committee which was established to assist and advise in the preparation of a book on library buildings, and as the chairman of the Higher Commission's Library Committee for the Southern Association of Colleges and Schools. Also for the Southern Association, he visited Alabama A & M College as a member of the evaluative team for the self-survey. He took part in the meetings of state, regional, and national library associations, was a guest speaker at the Kentucky Library Association meeting.

His article, "The University of Tennessee Library Lecture Series, 1949-1963," appeared in the April issue of STECHERT-HAFNER BOOK NEWS.

TOTALS	266,402	321,222	54,820	25.7

(In November 1963 a new method of counting circulation was evolved: only materials actually charged out would henceforth be counted; the categories would be "Personal Use," "Reserves" and "Interlibrary Loans." This eliminates "Use in Building" counts, which was used last year. The chart on page 2 reflects an adjusted circulation total based on the above table.)

THE UNIVERSITY OF TENNESSEE LIBRARIES in 1963/64 continued its accelerated pace in all phases of library operation. One of the most satisfying of the year's activities was the use of $420,048 for books, periodicals, and binding, a total of $112,655 more than was spent in 1962/63. The increase in book funds was gratifying to both librarians and faculty, since it was a substantial indication of library support on the UT campus. In the amount spent for books, periodicals, and binding, Tennessee rose in the statistics of the Association of Research Libraries (64 academic institutions) from 38th to 34th, a respectable gain in such company.

The Library Development Program, initiated to help bring UT to library adequacy, contributed $38,684 to the book fund, which is approximately $15,000 more than has been collected by this movement in any one period since its beginning in 1959. Dr. John C. Hodges, the coordinator of Library Development, has been and is doing a dedicated and effective job, and we are proud and happy that he is turning his energy and interest to our benefit. Thanks to his efforts, there were seven Patrons (those giving $1,000 or more) listed in the fourth Library Development Report. Among them were Hamilton National Bank, White Stores, Inc., Mr. and Mrs. John E. Lutz II, Romance Language Department, Alumni Association, Better English Fund, and an anonymous Patron. Several new endowments were set up, one of them, by the University Board of Trustees, quite properly in honor of John C. Hodges. The outstanding gift of materials was the Kefauver Papers, described in the section on Special Collections.

SERVICE IN THE KNOXVILLE LIBRARIES . . . . . .

Circulation of books and library materials rose for the eighth consecutive time, with the greatest increases noted in branch libraries and in Special Collections. The Biology Library gained 38.4 per cent; Business, 15.5 per cent; Engineering, 25.4 per cent; and Science, 49.2 per cent. Special Collections increased 53.9 per cent over last year.

Interlibrary loans to other libraries increased 14.5 per cent. The Main Library loan desk sent out 17.3 per cent, or 589 more volumes than in 1962/63. Except for Business Administration and Science, the branches showed substantial increases in volumes lent.

Borrowing from other libraries increased 26.7 per cent for Main and all the branches. The Reference desk at Main borrowed 35.8 per cent more than in 1962/63. This steady, year-by-year increase in interlibrary borrowing by this library is a matter which should be watched carefully, since it indicates that we do not have at hand all the books which our patrons want and need. Interlibrary loan, with its procedures to follow and necessary records to be kept, is a full-time activity in both the Circulation Department where books are lent, and in Reference where they are borrowed.

ORDER AND PROCESSING . . . . . .

The Order Department became the Acquisition Department on July 1, 1963. Miss Branch's title was changed to Acquisition Librarian, and Jack Thompson became Order Librarian. Miss Branch and various faculty members and representatives of departments studied and worked on the preparation of an acquisition policy for the University.

The Processing Department, working with an unfilled new position for the full year and an unfilled junior catalog position for part of the year, added 5,209 more volumes than in 1962/63. Cataloging is one of the library procedures requiring highly skilled workers, and a cataloging vacancy is difficult to fill. All the Processing staff is to be congratulated on the fact that we have no cataloging arrears such as plague many libraries. There is no backlog of uncataloged collections, and the day-by-day acquisitions are kept well under control.

SPECIAL COLLECTIONS . . . . . .

One of the items listed in the minutes of a meeting of the Subcommittee on Special Documents is "Kefauver, Estes. Papers, books, and mementoes. 59,000 lbs." This is succinct mention of one of the University of Tennessee's greatest acquisitions in the field of special collections. The late Senator Kefauver's papers, from his offices in Washington and Chattanooga, include letters, speeches, copies of the bills he wrote, copies of congressional hearings he conducted, books, and mementoes. The Kefauver Papers will be invaluable to historians, political scientists, and other scholars through the years. The gift was made by Mrs. Kefauver through the Estes Kefauver Memorial Foundation.

Other important additions to the Special Collections Library include the following:

Blanton, Margaret Gray, collector. Tennessee Johnson's Eliza. ca. 330 pieces. Notes, clippings, photographs, photostats, transcripts, correspondence and mementoes collected in anticipation of a biography of Eliza McCardle Johnson. Gift of Mrs. Blanton.

Cobb, William. Plea of debt against Archer Evans, Jonesborough, Nov. 3, 1795. 1 1. printed form filled in by hand. Signed by J. A. Sevier, Clerk.

Fitzgerald, N. E. Letters, 1943-1947, to and from UT students in the armed forces. ca. 300 pieces. part typewritten, part handwritten. Letters exchanged by the Dean of the College of Education with students in service. Gift of Dean Fitzgerald.

Mather, Cotton. Letter, dated 16 June 1692, to George Corvin. 1 1. handwritten. Gift of Mrs. Louise M. McCleary.

Miller, Mrs. Helen (Topping) 1884-1960. Scrapbooks, 1916-1957. 10 v. Include correspondence, clippings of reviews and periodical stories, typescripts, and mementoes of the prolific Tennessee writer. Gift of F. M. Hill.

Miller, Malcolm. Knoxville drama critic and impresario. Theater collection 1925-1963. ca. 2500 pieces: correspondence, programs, autographed photographs, reviews, scripts, and memorabilia. Gift of Malcolm Miller estate.

Park, James. An inventory of the real and personal estate of James Park, deceased, taken on the 3d day of February, 1854. 138 p. handwritten. 31 cm. Records of the Park estate, Knoxville, showing assets, receipts, payments and disposition, 1854-1877.

Pope, James. Former senator from Idaho and TVA Director. Papers, 1939-51. ca. 8,000 pieces. Official and personal papers pertaining mainly to TVA. Gift of Senator Pope.

The Special Collections Library, containing 10,174 books and 406,275 manuscripts, is being used more and more each year. Since it opened in September, 1959, with 1,980 volumes and 108,000 manuscripts, its circulation has risen from 510 to almost 3,500. Circulation of Special Collections material increased 53.9 per cent over the 1962/63 figures. The 29 tons of Kefauver material have been placed in a special locked section of the library stacks outside the Special Collections Library. It seems inevitable that expansion for Special Collections must be seriously considered very soon now. The Kefauver Memorial Foundation has discussed plans for a Kefauver wing in conjunction with the Special Collections Library, but in view of the great interest shown in Special Collections, some shelving relief should be given in the interim before the Kefauver Wing becomes a reality.

These important source materials should have some priority in the matter of space released when Undergraduate Library moves into separate quarters.

THE NEED FOR SPACE . . . . . .

As indicated in last year's report, the undergraduate library stacks should be filled to working capacity (40,000 volumes) before the end of next year. We added 4,634 books, bringing the UGL collection to 36,307 volumes. Special Collections Library is overflowing its quarters. Use of the reading rooms and lounges is, as has been the case, extensive.

The Engineering Library has no storage space and is fast using up the space for books. In fact, if all the books charged out were returned at one time, they would have to be stacked on the floor.

The Agriculture Library needs expansion.

The new quarters of the Biology Library contain twice as much space as the old; however, the strong graduate programs now in progress mean increased book allotments and increased graduate enrollment.

Science Library is generally crowded. There is no work space as such for the staff, so a much-needed reading table sometimes has to be used.

Increased space in both Business Administration and Education branch libraries has been proposed; and even though most of the Biology books have been removed, the Law Library is still lending stack storage space for materials from Engineering and Agriculture. The bookshelves in the Law Library are needed for Law books, and we hope soon that this will be the case.

The steadily increasing enrollment is taxing library seating capacity. The fall quarter 1963 enrollment in Knoxville was 11,823. We can seat 16.3 per cent, or .2 per cent less than we could last year. This situation is undesirable, particularly in view of the vast need for student study space.

STAFF ACTIVITIES . . . . . .

Don Jett, Science Librarian; Tom Rogero, Engineering Librarian; and Stewart Garrett, Cataloger, are the members of the Director's "Youth Committee," which was formed to investigate the ramifications of automation. They have attended several meetings on automation, information storage and retrieval, data processing, etc., at various association meetings and institutes.

The Director taught two courses (Library Buildings; Library Administration) during the summer session, School of Library Service, Columbia University. The National Book Committee asked him to serve as its judge in the 1964 Library Buildings Award Program, co-sponsored by NBC, the American Library Association, and The American Institute of Architects. He contributed two articles to Southeastern Librarian and, at the request of the editors, book reviews to College and Research Libraries and Library Journal. He served the Southern Association of Colleges and Schools on the LSU and SMU Visitation Teams and continued as chairman of the Committee on Library. He again represented ARL on the ASA Z85 Committee and continued on several ALA, ACRL, and LAD committees. Schools asking his advice on library buildings and services included Western Kentucky State College, Berea College, Appalachian State Teachers College, Miami University in Ohio, Stanford University, Eastern Montana State College, Radford College, University of Tampa, Wake Forest College, Eastern Kentucky State College, Johnson C. Smith College, and Scarritt College for Christian Workers.

G. M. Abel, Administrative Assistant, attended library dedications at Notre Dame and Auburn Universities. He continued as manager of The Tennessee Librarian.

John H. Dobson, Special Collections Librarian, remained as editor of The Tennessee Librarian.

The Mary E. Baker Library Scholarship Fund, given by the staff each year to a nonprofessional staff member who wishes to go to library school, was offered to Patricia Nichols, Assistant in the Reference Department.

Library Lecture #16, The Public Relations Activities of the University Librarian, was delivered by James T. Babb, Librarian of Yale University.

University of Tennessee LIBRARIES

Annual Report

JUNE 30, 1965

William H. Jesse, Director

THE UNIVERSITY OF TENNESSEE LIBRARIES

A N N U A L R E P O R T

For the Period July 1964 through June 1965

William H. Jesse, Director

The University of Tennessee Library, Knoxville . . . . . .

ANNUAL REPORT, 1964/65

During 1964/65 three new libraries were planned for the University of Tennessee: a separate undergraduate library at Knoxville, a new library for Martin, and an addition to Main in Knoxville to hold the Estes Kefauver Memorial Library.

The Director of Libraries, the associate director Ruth Ringo, G. M. Abel, and Katherine Montague (Undergraduate Librarian) acted as advisor-consultants in the development of Martin's library plans. The undergraduate library was planned by a committee appointed by the Academic Vice President (The Advisory Committee on the Planning of an Undergraduate Library), two consultants, and library administrative officers. A committee for the Kefauver Memorial Wing, selected in June 1965, met five times that month and made plans for space to hold the Kefauver papers and personal mementos, working areas for scholars and historians, and a reconstruction of his Washington office.

The new construction will relieve the crowded reader/book accommodations for a while, but only 13.8 per cent of the 1964 fall enrollment on the Knoxville campus (14,111 students) can be seated in the libraries. We want to have seats for 25 per cent of the official planning figure of 25,000 students (including 7,000 in the graduate school) the day the enrollment reaches that level. Presently we seat 1,167 in Main, and we hope ultimately to have 3,000 reader stations in the undergraduate library (the initial unit will hold only 2,000) and to accommodate 2,083 readers in the branches by adding 1,397 stations as expansion space is made available to these badly overcrowded outlets.

The fifteen-year-old Science Library, serving the chemistry, physics, geography, geology, mathematics, chemical and nuclear engineering departments, needs space for books, readers, and staff. The Engineering Library has outgrown its quarters in Ferris Hall. Infrequently used materials are stored elsewhere on the campus; we attempt to make these available on 24-hour notice. To improve services and accommodations in the areas of the basic and applied sciences, a combined science-technology library is being contemplated.

The Biology Library moved into new quarters in the fall of 1964 with twice the floor space of its old housing, but little-used books will soon have to be stored elsewhere on the campus. When the present Administration Building is vacated, perhaps Biology can expand into the released space.

The Agriculture Library has outgrown its quarters, and storage is necessary there, too. It is expected that new buildings on the Agriculture Campus in the next three years will release space in Morgan Hall for the library's expansion.

The branch libraries in the social science (Business, Education, Law) are reaching capacity. Larger quarters will be sought when additions are planned to the buildings of the various colleges.

The recently added programs in architecture and planning will in all likelihood require new library facilities.

Library Use and Service

Public Services

The recorded use of books on the Knoxville campus increased 13.7 per cent over last year. The librarians at the Main Library loan desks handed out 8.2 per cent more books, and increases in the branches went from 2.5 per cent in Agriculture to 67.4 per cent in the Biology Library, which occupied its new quarters in the Hesler Building addition in September 1964.

Interlibrary loans lent to other libraries rose 18.6 per cent; those borrowed from other libraries increased 4.2 per cent.

The recorded reference questions increased 10.6 per cent. Tables of circulation and reference statistics for each library are appended.

The following figures show the state-wide pattern of circulation of books for the past five years.

State-Wide Circulation of Library Books
1960/61-1964/65

	1960-61	1961-62	1962-63	1963-64	1964-65
Knoxville	296,055	323,742	323,131	330,182	375,418
Martin	23,369	26,862	34,721	35,861	33,749
Memphis	61,763	79,216	134,246	125,467	154,079
Totals	381,187	429,820	492,098	491,510	593,246

Technical Services

The Acquisitions Department spent almost $50,000 more on books, periodicals and binding than last year. Outstanding additions to the collection are listed in the appendix to this report.

The Processing Department added 45,924 volumes to the collection, more than 8,300 over last year. Cataloging statistics are appended.

Library Support

Formally budgeted funds for the Knoxville libraries were increased $51,000. In addition, allocations were made for books of $50,000 from the University and $4,500 from NASA. The Library Development Program received $54,698 and more than 8,000 books from alumni and library friends.

The attitude of the University Administration is sympathetic toward the library; the Graduate School office is alert to the needs of the graduate programs; the faculty preponderantly is active and interested. This atmosphere has resulted in stronger book collections for most of the schools and colleges. The Basic Sciences are strong; book-buying for Engineering has been emphasized for several years. Agriculture remains strong. Home Economics and the Social Sciences are adequate; however, efforts to enrich the holdings of all areas continue.

The Library Administration is deeply grateful for the many evidences of official and individual interest in and concern for the library's staff, housing, and collections.

Staff Activities

Staff travel for education and observation of new library buildings, automated processes, and technical advances increased during the year. The new undergraduate library building planning and discussions regarding automation of the book-charging and book-ordering procedure brought about several trips by the staff: Mr. Abel, Library Automation Conference sponsored by IBM at Endicott, New York; Grand Valley State College in Michigan; Florida Atlantic University, Boca Raton (with Mr. Jesse). Paul Trentham and Don Jett attended the Clinic on Library Applications of Data Processing at the University of Illinois in Urbana, then saw the new University of Illinois Library in Chicago with Katherine Montague, who also visited Stephens College in Columbia, Missouri.

Participation in local and regional professional and education associations took several staff members to various meetings and conferences: As members of evaluation teams for the Southern Association of Colleges and Schools, Miss Branch went to Charleston College (South Carolina); Mr. Abel to Hardin-Simmons College; Mr. Jesse to the University of South Florida (Tampa).

For the library associations, Miss Ringo and Mr. Jesse attended a workshop in Atlanta as members of committees to plan future programs of the Southeastern Library Association. John Dobson continued as editor of the Tennessee Librarian; Don Jett replaced G. M. Abel as business manager of the quarterly. Misses Montague and Mitchell, Mr. Jesse, G. M. Abel, John Dobson, and Stuart Garrett attended the annual Tennessee Library Association meeting in Memphis. Tom Rogero went to the Special Libraries Association conference in Philadelphia, and various staff members regularly attended the Oak Ridge Chapter's meetings.

Informational visits relative to techniques and procedures included those of Norman Watkins to the Southern Library Bindery (Nashville) and the University of Denver workshop on the care, binding, and repair of library books, and Aubrey Mitchell, Agriculture Librarian, to the forestry libraries at Syracuse, Harvard, and Duke Universities.

Recruitment trips were made by G. M. Abel (Florida State and Emory University library schools) and John Dobson (Carnegie Institute).

Several schools and colleges requested advisory assistance from library personnel: Mr. Jesse helped plan library buildings for Knoxville College, Lenoir Rhyne College, Eastern Kentucky, Villa Madonna, Clinch Valley, Lincoln Memorial, Union University, Bethel College, Georgetown University, and Radford College, with Mr. Abel's assistance on some. Mr. Dobson advised the Carnegie Institute of Technology on a special collections library.

The Mary E. Baker Scholarship ($1,000) went to Mary Greer, cataloging assistant in the Processing Department. She will attend library school at Florida State University. This fund, underwritten by the professional staff, is maintained by fund-raising activities of the entire library personnel.

In recognition of the Library Development Program, the library staff sponsored an endowment fund for library books, which now totals $1,250.

David L. Kaser, Director of Joint University Libraries, was guest speaker at the seventeenth annual library lecture. His paper, Academic Science and the University Library, was presented March 30.

All in all 1964/65 was a full, productive, and satisfying year.

THE UNIVERSITY OF TENNESSEE LIBRARY

Annual Report

June 30 1966

William H. Jesse, Director of Libraries

THE UNIVERSITY OF TENNESSEE LIBRARY

Annual Report

June 30 1966

William H. Jesse, Director of Libraries

ANNUAL REPORT, 1965/66

Plans for Future Expansion

Reader accommodations in the Knoxville libraries increased by thirty seats, but the percentage of the enrollment which can be seated in the library installations declined from 13.8 per cent to 12.9 per cent. Although the American Library Association recommends that one third of the student body be able to find seats in the campus libraries, the UT library planners are using 25 per cent, after a study made in connection with planning the new undergraduate library showed that a great many institutions aim for 25 per cent. Agriculture library quarters will be expanded when the Plant Sciences building is completed and releases space in Morgan. The first unit of the new undergraduate library will add approximately 1,600 seats, and our biennial request urges that future additions to existing buildings now housing branch libraries (Education, Business, and Law) include as much expansion as possible for these branches. A requested addition to the Main Library for studies and seminar space would provide a few more seating accommodations.

But an urgent library need which can be expected to add a substantial amount of reader space and lessen the gap between 12.9 per cent and 25 per cent seating capacity is the library to serve Science, Biology, and Engineering. We requested for the coming biennium (1967/69) two million dollars to construct a library on the present site of Science Hall, where it can be accessible to all its users and at the same time effect economy in library materials, staff, and equipment.

If our proposed science/engineering library is to be included in a new science/engineering building, we recommend that this building contain a minimum of one million dollars worth of construction for initial library accommodations and be planned for easy and economical expansion at any time. We recommend (1) A lower level, facing on Middle Drive for engineering books and materials, which could be reached by students and faculty from the surrounding engineering buildings with a minimum of effort and delay; (2) A level, opening off Circle Drive to house the materials for the sciences. These two entrances, Middle Drive for engineering, Circle Drive for science, should be level with the collections they serve--no steps up, no steps down. There is no virtue in making the search for knowledge any more difficult than it need be. We recommend strongly that adequate escalators be included, either within the library portion or outside, but immediately adjacent, to move the traffic between these two levels in the most efficient way.

Additional levels in this library installation are sorely needed for housing books and library materials, for carrells, studies, and seminar space for the graduate programs, and for the microprint and copying equipment which is becoming so necessary. We urge that every consideration be given to provision in the initial unit of as much space in addition to the above described levels as can be realized within monetary boundaries. In any event, we request a freely expansible building.

In summary, then, we are requesting a minimum of one million dollars for library quarters to serve the College of Engineering and the physical and natural sciences departments. Inclusion of Biological Sciences, which would be logical and highly desirable, will require more money.

* * * * * * * * * * * * *

Work on the plans for the new separate undergraduate library, begun in 1964, continued. G. M. Abel, Assistant Librarian and chief liaison between the architects and the Development Office, the director, associate director, undergraduate librarian, and others worked with Mr. Gaskill of the architectural firm Yeates and Gaskill in review and revision, if called for, of sketches and design. Yeates and Gaskill also designed the Martin branch library, and the Knoxville librarians were on call to assist in the revision and review of plans and sketches for the Martin branch. Miss Eleanor Goehring, Reference Librarian, joined the group mentioned above to advise, upon their request, the planners for the proposed Nashville Center, which is to provide extensive library service.

This seems an opportune time to express appreciation to the fine architects who have done such excellent work for us: Ben McMurry, Jr., of Barber and McMurry in Knoxville, for the Kefauver Wing; William H. Gaskill of Yeates and Gaskill, Memphis, for the Martin branch library and design of the soon-to-be-begun undergraduate library, which promises to produce an outstanding library structure.

The Kefauver Wing

On June 28 of this year the Estes Kefauver Memorial Library was dedicated, approximately fourteen months after Governor Frank Clement signed a Miscellaneous Appropriations bill providing $125,000 to construct and equip a wing on the UT Library for the Estes Kefauver papers, given in 1964 to the University by Mrs. Kefauver, through the Estes Kefauver Memorial Foundation. A gem of architectural skill, the wing is a handsome, dignified memorial and, at the same time, an excellent work place for historians and scholars. Every inch of space was used to the best effect with no sacrifice of beauty to utility, or vice versa. The dedication ceremonies were attended by noted political and educational leaders, the Kefauver family, friends and colleagues of the Senator. Senator Henry M. Jackson gave the address, and Governor Clement, as Chairman of the Board of Trustees of the University, accepted the building. The Kefauver collection is considered the University of Tennessee's most valuable source material in the areas of history, government, and political science, a treasure for which we are most grateful.

Use of the Library

State-wide library use increased 10.5 per cent above last year. In Knoxville, where enrollment went up 8.2 per cent, the total increase in book circulation for the Main Library and branches was 13.6 per cent. Reference questions rose 19.3 per cent; Interlibrary loan transactions went up 19.7 per cent for volumes lent and 19.2 per cent for those borrowed. The greatest circulation increase was noted in Documents where use rose 33 per cent. Memphis and Martin reported increases of 4 per cent and 6 per cent respectively.

Technical Processes

The Acquisitions Department, in its busiest year ever, handled book, periodical and binding funds of $487,940. 640 new titles were added to the periodical subscriptions list, making a total of 6,110 periodicals (not including duplicate issues) received by the University of Tennessee's Knoxville libraries. Outstanding and significant additions to the collection are appended.

The Processing Department, which catalogs, classifies, and prepares the materials for use, added 50,245 volumes to the Knoxville collection, nearly 5,000 more than was added last year, representing a great effort for

this department, working as it was with a limited staff, since one of its professional positions was unfilled for the year. Catalogers are in short supply nationally, and the University of Tennessee is fortunate indeed to have a nucleous of dedicated and competent catalogers who each year turn out a tremendous amount of work. The annual number of volumes one cataloger can process has been estimated by time and work experts at 4,000 a year, so it is evident that the seven who added 50,245 volumes last year are highly effective workers deserving of praise and appreciation.

Gifts

Dr. John C. Hodges, coordinator between the Development Council and the library, has brought the Library Development Program to a major factor in library support. Last year the Program received gifts of $88,191 and 4,500 books. New endowment funds for the year totaled $75,156. Since its inauguration in 1959, the Library Development Program has been responsible for gifts of 36,530 books and $239,928 for the purchase of books. Dr. Hodges, Professor Emeritus and former Chairman of the English Department, works untiringly to make this library equal to the finest in the country. None of the donations he is responsible for can be any greater than his own--that of his time, energy, and devotion to the cause of the University of Tennessee and its library. He is an inspiration and a challenge to us all, and we take this opportunity to thank him most gratefully.

Among outstanding gifts to the Special Collections Library, where treasures of historical, social, and literary merit can be preserved and serviced, are:

Gordon Aronhime. Autograph book of notable persons.
Major General Percy Pope Bishop. Memoirs (3 vols.), 1898-1941.
J. W. Boulton. Dunlap family papers, 1876-1881.
Ira N. Chiles. Lynn family records, 1812-1868.
Mr. and Mrs. Hector Coffin. Notes for life of Charles Coffin (1775-1853), president of East Tennessee College, 1826-1832.
Letter of resignation to the Trustees, October 20, 1832.
Richard Beale Davis. Typescript manuscript for the prize-winning Intellectual Life in Jefferson's Virginia, 1790-1830.
Robert Drake. Manuscript of Amazing Grace, 1965.
Lawrence Edwards. Speedwell manuscripts.
Leon A. Gouffon. Records of Staub's Theatre, 1907-1912. 7 vols.
R. L. Goulding. Letters of William R. B. Hackley, 1863-1866.
Gray Cemetery records, 1851-1867

Mrs. Walter Howard. Battle of Horse Shoe Bend, with map, 1814.
Mrs. Elizabeth Kelly. Unpublished history of the Rhea Springs, Rhea County, community. Xerox copy.
Harry Harrison Kroll. Manuscript of Riders in the Night.
Frederick Maloof. Signed documents by William Blount (1787). Andrew Jackson (1801), and Sam Houston (1827).
DeWolfe Miller. Unpublished manuscript of Melungeons: the Vanishing Colony of Newman's Ridge.
Dorothy Ryan. Letters from Eudora Welty, Gilbert Highet, John Mason Brown, Hodding Carter, and Emerson Greenway, 1963-1964.
Maynard G. Sayles. Diary of Maynard E. Sayles during the Spanish American War in the Phillippines, 1898-1899. 2 vols.
Fred G. Wolfe. Autographs of notable persons. 2 vols.

Staff Activities

Travel for observation and information:--Olive Branch, Acquisitions Librarian, and G. M. Abel, Assistant Librarian, inspected the automated book-ordering processes at Joint Universiy Libraries in Nashville. Helen Hier, Undergraduate Reference Librarian, attended a workshop on personnel utilization at Emory University in Atlanta; Aubrey Mitchell, Agricultural Librarian, a conference on development of leadership skills at Peabody Library School, Nashville; Mary Frances Crawford, Assistant Reference Librarian, a workshop sponsored by the Home Economics Association in Nashville; John Dobson, Special Collections Librarian, Seminar on Archival Management at the Tennessee State Library in Nashville.

G. M. Abel attended an institute studying the changing environment for library services in metropolitan areas, held in Allerton Park at the University of Illinois. Robert Harrison, in charge of library properties, attended annual meetings of the Kentucky Microfilm Association in Lexington and the National Microfilm Association Washington, D. C. David Kirk, Stacks Supervisor, went to Atlanta for the Institute on System Planning for Library Automation; G. M. Abel, LaNelle Vandiver, Paul Trentham, Norman Watkins and David Kirk attended the Machine Records Conference in Gatlinburg.

Attendance at associational meetings and representation of UT:--Ruth Ringo, Olive Branch, Eleanor Goehring, and LaNelle Vandiver to the annual summer conference of the American Library Association in New York City; G. M. Abel to the Association of Southeastern Research Librarians at Jekyll Island, Georgia, and the Midwinter meeting of the American Library Association in Chicago, which included the annual meeting of the Association of Research Libraries; Tom Rogero, Engineering Librarian, to the annual conference of the Special Libraries Association in Minneapolis. Mary Jane Sharp, Cataloger, represented the University of Tennessee at the ceremonies observing the accessioning of Joint University Libraries' millionth volume.

Advisory assistance:-- Olive Branch inspected the book collection at Morristown College and made a written report of her findings, at the request of the President of the school. Helen Hier, at the request of the Committee on Grants of the Association of College and Research Libraries, visited Southern Missionary College in Collegedale, Tennessee, to advise on the strengthening of the reference collection. G. M. Abel was a member of the Visiting Committee of the Southern Association of Colleges and Schools at Tarleton College, Stephenville, Texas, and advised Union College in Barbourville, Kentucky, on their library building plans.

Other activities:--Tom Rogero edited the most recent volume of library lectures, which contained Lectures 16, 17, and 18

Lecture No. 18 was given by Dr. Stephen A. McCarthy, Director of Libraries at Cornell, on March 28.

John Dobson, for the fourth consecutive year, edited the Tennessee Librarian, the quarterly publication of the Tennessee Library Association. Don Jett, Science Librarian, again served as business manager.

The Library Staff Endowment Fund for the purchase of library books rose to $2,122.

The Mary E. Baker Library School Scholarship of $1,000 was raised by the entire staff and awarded to Carol Monroe, Undergraduate Library Assistant.

LIBRARY
THE UNIVERSITY OF TENNESSEE
KNOXVILLE 37916

BIENNIAL PROGRAM*
July 1, 1967 to June 30, 1969

Physical Plant

Branch Libraries

A Science-Technology Library is the most urgent need for the next biennium. Accessibly located where Science Hall now stands, it can serve the scientists and engineers on the Hill to far greater advantage than is presently possible with our three cramped and inadequate branch libraries, Biology, Science, and Engineering. The materials needed by the clientele of these three branches overlap; they should be accessible in one appropriate and modern facility. The students and faculty in these disciplines are handicapped and frustrated by lack of space for seating, studies, seminar rooms, and modern equipment (copying machines, microprint readers and printers, among others), as well as space for the housing of books and printed materials, the most basic of library needs!

The University of Tennessee employs experienced and trained staff for each library; it has through the years purchased expertly selected books for its high-caliber faculty and student body, who are now forced to seek these books in three widely separated library facilities, and often to wait for them to be brought from some distant campus storage space. It is a waste and a hindrance; library quarters for these increasingly important areas of knowledge should serve rather than hamper.

Our cost estimate, based on our construction experience alone, and without assistance from architects or engineers, is $2,000,000 for a science-technology library to serve growing graduate programs and undergraduate enrollments.

The other branch libraries, Agriculture, Education, Business, and Law, are in quarters that fall far short of meeting space needs for books and readers. We urge that additions approved in the University building program for the next four years be sure to include expansion for the Education, Business, and Law libraries. More space will be available to the Agriculture Library in Morgan Hall when the Plant Sciences building is completed. New shelving, chairs, tables, and staff furniture will be needed, at an estimated cost of $35,000.

*Knoxville Division

Main Library

Faculty studies, seminar, work area:--The Library Committee places the highest priority on faculty studies. A minor construction job could provide twenty-five studies, a seminar, and much needed work space for Technical Services. The estimated cost is $65,000, and there is a possibility that a donor may provide as much as a third of this estimate.

Shelving:--When the new Undergraduate Library building is completed, the UGL area in the Main Library will provide another stack level. More stack area will be released for books by moving federal documents from the third stack to what is now the Reserve Book Room. Costs for equipping these two areas are estimated at $27,000 for UGL and $10,000 for RBR.

For the first year of the biennium, to provide emergency shelving which is badly needed, we are asking for $4,000 for the main stack area and $3,000 for the present Undergraduate Library to provide additional shelving which is needed in the interim before UGL moves into its new building.

Air conditioning:--Lack of temperature and humidity controls in the old part of the Main Library is becoming critical. Last summer resignations of two capable and long-term library assistants were found to have been motivated by the oppressive atmospheric conditions in their department. Both readers and staff find the public service areas in the old building (Circulation, the card catalog, Reference, the reading lounge, and the Reserve Book Room) to be almost unbearable in the summer. Dr. Spivey said: "In the new biennium we shall do some new constructing and some further air-conditioning, until finally we have completed the renovation and the air-conditioning of our major buildings. The library is among those on the waiting list."

Books, Periodicals, and Binding

For the first year of the biennium, we ask an increase of $150,000 over the current $450,000 to meet requests from the faculty and staff for books and new periodical subscriptions; to begin a buying program for the new Undergraduate Library; and to increase the binding allotment.

For the second year, we request that $50,000 be added to the above amount.

Equipment

We estimate we will need $30,000 each year of the biennium (a total of $60,000) for miscellaneous equipment: desks, chairs, and typewriters for new staff; counters for reference indexes, Kardex units; card catalog cabinet for the Science Library; shelf list cabinets, book trucks, vacuum cleaners; safety step ladders for stack area; microfilm readers, micro reader-printer, micro-fiche cabinets, etc.

Operating

Our estimate for operating expenses during the biennium is $98,800. This increase of around $10,000 over our expenditures for the past two years is needed to cover expanded services and price increases.

Staff

For the first year, we will need eleven additional non-academic staff members and one academic staff member, assigned as follows: academic, Reference; non-academic, Acquisitions 3, Circulation 3, and one each for Reference, Processing, Binding, Education, Law.

For the second year, we will need twelve additional non-academic staff members: Undergraduate Library 8, Processing 1, Binding 1, Documents 2.

We ask for $5,000 to take inventory of the Main Library collection, which has not been done since 1962 and should not be delayed much longer. Three teams of 2 persons each working three months could accomplish a major part of this project. This amount is included in our request for temporary help which also covers pages, book cleaners, turnstile attendants, receiving room clerk, attendants for Xerox machines and microform readers and materials. The allotment for student help, also "temporary," includes an increase in the hourly rate from $1 to $1.10 the first year and to $1.25 the second year. We request 165 additional student hours.

Our total request is for $1,059,332 for our regular staff and $250,363 for temporary help, including inventory, for the biennium.

Summary of Library Biennial Program 1967/1969

I. Physical Plant

(Cost estimates are by librarians, not architects and engineers)

Science-Technology Library building	$2,000,000
Faculty studies, seminar, and work space in Main Library	65,000
Air conditioning in old portion of Main Library	
Shelving for Main stacks (1st year)	4,000
Shelving for Main Library--Area vacated by Undergraduate Library.- For book shelving	27,000
For documents (2nd year)	10,000
Equipment and furniture for Agriculture Library in new quarters in Morgan Hall	35,000
UGL shelving (1st year)	3,000

II. Library Operation

		1967/68		1968/69
Books, Periodicals, Binding		$600,000		$650,000

ANNUAL REPORT, 1966/67

PERSONNEL--NEEDS AND ACTIVITIES

Five years ago the University of Tennessee Libraries on the Knoxville campus spent $250,819 for books, periodicals, and binding, circulated 323,131 materials, and added 32,377 new volumes, with a staff of 87 people. Today, bookstock expenditures have increased 140 per cent, added volumes 81 per cent, book use 54 per cent, and personnel 34 per cent.

The slower increase in staff may be attributed to staff capability, efficient procedures in acquiring, processing, and servicing of materials, and a low turnover in key posts. With two exceptions, the major supervisory staff in Knoxville represents at least ten years of service in the system. For supporting staff, the library is fortunate to employ currently several accomplished young men and women who will enhance librarianship whether or not they eventually seek a degree in library science. Some of these have been with us many years and we hope will continue to be with us for many more years. All our people have taken the unprecedented increases in library use and acquisitions in stride year after year, but there comes a time when the sheer weight of growing traffic overwhelms even the most efficient procedural system, when new methods must be devised or more workers immediately rushed to the rescue.

We have always believed that the best, most economical service can be had by utilizing a well-trained staff and keeping an eye out for adaptations of time-saving and accuracy producing business and management equipment. In line with this idea, the Director several years ago set up his "Youth Committee," three young men who in addition to their regular professional duties took on the investigation of automation's application to libraries. The time has now come, we feel, in the interests of effective and economical service, to speed up our investigations. In the coming year, then, an automationist will devote full time to the study and recommendation of automated procedures as they apply to the University of Tennessee Library.

In the interim between recommendation and installation, there is no denying we must have more people to serve the influx of users and to process the books for them. Additional staff will be needed for the Undergraduate Library soon to be built, for the facilities released in Main when Undergraduate moves out, for branch libraries with their increased hours and services, and for the proposed and hoped-for new Science/Technology Library.

Professional librarians have been in short supply for many years and are still scarce. A recent comparison of current salary schedules of twenty schools belonging to the Association of Southeastern Research Libraries shows Tennessee's salary scales to be near minimal in almost every category both for professional librarians and clerical and supporting staff. (Some of the ASERL member schools are Georgia Tech, Vanderbilt, LSU, Kentucky, North Carolina, Alabama, Mississippi State, Florida.)

Minimum and Maximum Salaries Budgeted for 1967/68
for ASERL Libraries

Categories of Personnel	Number of Libraries Reporting	ASERL		University of Tennessee			
						Rank	
		Low	High	Low	High	Low	High
Department Heads	20	5,800	14,371	5,800	13,500	20	5
School & Branch Librarians	12	5,800	20,000	5,800	12,250	12	11
Other Professional Librarians	21	3,500	15,000	5,000	10,400	19	10
Nonprofessional staff	21	2,520	10,166	2,700	6,200	19	14

This was a surprising revelation, and rather a disquieting one, for it may leave us vulnerable in competition for staff with other southern schools.

Staff Activities

The Mary E. Baker Scholarship, a grant of $1,000 provided by the Knoxville staff, was awarded to Colene Siler, Undergraduate Library Assistant, who will attend Emory University Library School. The scholarship, named in honor of the late Mary E. Baker, librarian at UT from 1923 to 1943, has been in existence since 1950. The staff has awarded fifteen scholarship grants to

nonprofessional colleagues, an activity designed to further the library profession through recruitment of able young people to the study of library science.

The Library Staff Endowment Fund reached a total of $3,154. The fund is a part of the Library Development Program and was suggested by a staff member as appropriate participation in the Program.

Library Lecture No. 19, "Librarianship Today--Crisis or Change," was delivered on April 4th by Dr. Jerrold Orne, Librarian of the University of North Carolina.

Six promotions in rank were accomplished: two from "professional assistant" to instructor, three to assistant professor, and one to associate professor. The staff continued professional activities in the form of travel for observation and information, advisory assistance to other schools, attendance at educational and library associational meetings, and various editorial and management duties.

Thomas Rogero, Engineering Librarian, is editor of RADIATIONS, the publication of the Appalachian Chapter of the Special Libraries Association. Don Jett, Science Librarian, was named membership chairman of the SLA Chapter. He was elected to serve as chairman of the Special Libraries Section of the Tennessee Library Association for the coming year; he continued to serve as business manager for TLA's quarterly publication, TENNESSEE LIBRARIAN. John Dobson, Special Collections Librarian, edited the TENNESSEE LIBRARIAN for the fifth consecutive year. LaNelle Vandiver, Head of Processing, advised the University of Oklahoma Library on conversion to the Library of Congress Classification. Ruth Ringo, Associate Director, helped Milligan College Library prepare a request for a grant from the Association of College and Research Libraries. G. M. Abel, Assistant Director, was a member of the UT Memphis Center Self-Study Committee and the visitation committee of the Southern Association in its evaluation of Atlantic Christian College, Wilson, North Carolina. Jesse Mills, Undergraduate Librarian, was on the visitation committee for Florida Atlantic University at Boca Raton. Olive Branch, Acquisitions Librarian, was one of the visitation committee for Georgia Southwestern College in Americus. At the spring conference of the Tennessee Library Association Miss Branch was elected chairman of the Tennessee Chapter, Library Resources and Technical Services of the American Library Association.

Association meetings attended by the staff include the American Library Association Summer and Midwinter conferences, Special Libraries Association, Tennessee Library Association, Southeastern Library Association, Association of Southeastern Research Libraries, Association of Research Libraries, and Tennessee Education Association.

LIBRARY USE AND SERVICE

Statewide use of library books advanced from 622,900 volumes circulated in 1965/66 to 703,525 in 1966/67. On the Knoxville campus book circulation was

16 per cent higher than last year, and questions answered by the Knoxville reference librarians rose 27 per cent, increases of consequence.

Record keeping affords some measure of the use of libraries, but these recorded circulation statistics include only those books actually charged over the counter; they leave uncounted in any way the great mass of informal use of books, periodicals, newspapers, indexes, guides, and other reference tools in all open-shelf and accessible installations. As to the count of reference questions, there are no user cards to add up at the end of the day, and the busy reference librarian may not always tabulate every question she answers. To strain at keeping records could defeat the purpose of reference service. Just as statistics cannot encompass the extent of library use, neither can statistical tables reflect the use of the physical facilities for study. In Knoxville the lounges and reading rooms are always crowded, and one of our important responsibilities is to afford the student an inviting and comfortable place near books, with minimal barriers to thwart his examination and use of them. In line with this charge, library hours were increased from 90 hours open a week to 98 hours: 8:00 to 11:30 p.m. on weekdays, 8:00 until 6:00 on Saturday, and from 1:00 until 11:30 on Sundays. During examination weeks, the libraries were open until midnight. The Undergraduate Library will contain a special study area which is expected to be kept open for long hours, all night if need be, during both regular and examination schedules.

Included in the circulation statistics are the records on interlibrary loans: 11,077 transactions in borrowing and lending volumes in Knoxville alone, more than half of which were recorded by the Main Library's Reference (where books are borrowed for use of faculty and graduate students) and Circulation (where books are lent to other libraries) Departments. Interlibrary loan activity in the branches is confined to direct local requests, such as those from TVA, Oak Ridge, Memorial Research Center, and others.

Interlibrary loan transactions in the Main Library have increased from 2,700 to 7,642 in the past five years, growing from a relatively minor public courtesy to a service needing the full-time preoccupation of at least one staff member in the Reference and Circulation Departments. In order to handle the increased volume of borrowing and lending and to relieve Circulation and Reference from threatened interference to their first duty, service to the students, interlibrary borrowing and lending will be merged into a single unit. Miss Helen Hier, former Undergraduate Reference Librarian, and her staff will introduce the combined service in the fall of 1967.

A library in a state-supported school of higher education has an obligation to the citizens, schools, and libraries within the state, and one way of discharging this obligation is by interlibrary loan service, thereby backing up the resources of the smaller schools and libraries, supplementing their holdings, just as the University of Tennessee libraries are in turn supplemented by the resources of the great research libraries. Interlibrary loan service is a cooperative action between libraries great and small, an important part of library service, regulated by the Interlibrary Loan Code of the American Library Association.

In line with increased cooperation, the Knoxville libraries will offer direct loans to the faculty and staff of the area schools and colleges, upon recommendation of the school's librarian. Local business and professional people are also given borrowing privileges, subject to the limitations imposed by student and faculty needs.

Other services:--The use of copying machines has become an indispensable service in libraries. Copiers are in use in Main and 4 of the branches, with plans laid to install them in the other libraries after the beginning of the new fiscal year.

For many years the library has employed messenger service for intra-library communication and pickup and delivery between library and nonlibrary offices, a half-day activity until July 1966. A truck is assigned to the library full time so that urgent deliveries may be made at any time during the day, in addition to completing regular routes.

THE NEED FOR SPACE

The Undergraduate Library is expected to be ready for occupancy in March 1969. The Agriculture Library will move into quarters vacated by Plant Sciences in Morgan Hall in the winter of 1967. In the meantime, new seats and shelving will be added to existing libraries wherever possible to increase seating and book capacities. American Library Association's Standards recommend that at least one third of the student enrollment be able to find seating accommodations in the library at a given time. Library seating capacity on the Knoxville campus has decreased steadily, and we expect, in the light of anticipated 1967/68 enrollment, to be able to accommodate no more than 10 per cent of the student body in 1967/68. The Undergraduate Library will relieve the situation somewhat, but even then Tennessee's percentage will not approach the minimum recommendation of the American Library Association.

Space is one of the most compelling needs for the libraries in Knoxville. The proposal for a Science/Technology Library in the Bienniel Program is most urgently reiterated, as well as the recommendation that additions approved in the University building program not fail to include expansion for any branch libraries located therein. Recommendations for faculty studies, a seminar room, and expanded work space for technical services in the Main Library are repeated.

LIBRARIES ACROSS THE STATE

A library has been established in the Space Institute at Tullahoma. Helen Burnett Mason, wife of the chairman of Tullahoma's Faculty Library Committee, deserves praise and gratitude for her initiative and unstinting service in the development of this new facility, statistics for which are included for the first time in the Library's annual report.

Memphis:--Space needs in Memphis have been somewhat alleviated by the removal of the carpentry and paint shops from the library building and remodeling of the released space for library use, decreasing for a time the need for a new building. Memphis received a Federal grant under the Medical Library Resources Act for library materials. The Science Librarian's Training Program, beginning in 1966, has provided staff members for three medical libraries and is expected to benefit not only the trainees but the Medical Unit's library staff as well.

Martin:--The new library building for the Martin Branch will be occupied sometime in January of 1968. This construction is expected to provide Martin with a functional and attractive library building.

Nashville:--The library administration in Knoxville has served as consultants for the growing library for the University Extension Center in Nashville. This library is important to the effective operation of the Center, and every effort should be made to provide adequate quarters for it in the new Center building.

RESOURCES

The first six months of the fiscal year saw an unprecedented increase in the acquisition of library materials, with funds at the end of the period reflecting this activity to such an extent that the library was obliged to request additional library book funds from the University Administration. The increase in buying

*Estimated

was caused by (1) a need for duplicate copies of many titles; (2) new areas of study requiring materials new to the collection; (3) the steady progress of graduate and doctoral programs; and (4) new areas of research demanding files of expensive materials. In the words of the Acquisition Librarian, "Neither the need for materials nor the enthusiasm of professors and library staff in acquiring these materials diminishes; rather there has been a quickening of interest and enthusiasm, a noticeable increase in activity throughout the entire University."

The University Administration made available a substantial sum to be used for book purchases during the remainder of the fiscal year.

Gifts to the Library Development Program accounted for 3,670 books and $113,051 for the purchase of books, making the total amassed by this program since its beginning more than 40,000 books and $352,979 in endowments, restricted funds, and currently spendable funds. Outstanding among gifts in 1966/67 is the Blanton Collection, the personal library of Margaret Gray Blanton and the late Dr. Smiley Blanton, and their manuscripts, typescripts, correspondence, diplomas, citations, and collection of material in areas of their interests. This gift has added substantially to the enlargement of holdings in undergraduate, graduate, and Special Collections. A list of notable acquisitions and gifts for 1966/67 follows.

From the report of the Special Collections Librarian to the Committee on Special Documents

Blanton, Smiley. Papers. ca. 1,000 pieces. Correspondence, literary manuscripts, addresses, research notes, citations, degrees, etc. of the noted psychiatrist and author. Gift of Mrs. Blanton.

LIBRARY
THE UNIVERSITY OF TENNESSEE
Report Covering the Period July 1, 1967-June 30, 1968

Within the State-wide library system, the University of Tennessee in fiscal 1968 celebrated the acquisition of its one-millionth volume, named and dedicated the Paul Meek Library at Martin, saw construction underway on the John C. Hodges Undergraduate Library in Knoxville, and, less uncommonly, made advances in use and service, support, acquisitions, minor expansion, and other areas of library operation.

The Millionth Volume

> One standard by which the greatness of any university is measured is the size and quality of its library. The general public, surrounded by the publicity which attends many other functions of the university, is frequently unaware of the achievements of this less spectacular heart of the institution. Yet this is the foundation upon which scholarship, and eventually that elusive goal named 'learning,' is based. In the quiet stacks, in the separate cubicles, in the common reading rooms, live (in a most literal sense) the purposes--the triumphs or failures--of the true university.
>
> It was a significant moment, then, when the library of the University of Tennessee recently acquired its millionth volume.[1]

The Board of Trustees at its meeting in Martin on February 2, 1968, framed a resolution commemorating the millionth volume added to the University library collections, an attainment which is, for many observers, coming to signify the validity of an institution's commitment to research and the extent of its support for advanced programs. The Papers of Andrew Johnson, Volume I, a UT Press publication edited by Dr. LeRoy P. Graf and Dr. Ralph W. Haskins, professors of history at the University, was selected to carry the inscription of millionth volume.

[1]Dykeman, Wilma. "Look to this day." The Knoxville News-Sentinel, February 18, 1968. [Used by permission of the author.]

The following day in Knoxville, at the annual meeting of the Century Club, Dr. Edward J. Boling, Vice President for Development, read the resolution and handed presentation copies to librarians representing UT's installations in Knoxville, Memphis, Martin, Nashville, and Tullahoma, and to Mrs. John C. Hodges.

John Cunyus Hodges, 1892-1967

Coordinator for Library Development, 1959-1967. Professor of English at the University of Tennessee for forty-one years. Chairman of the English Department for twenty-one years. Author, scholar, and the UT Library's greatest benefactor.

The relationship which began October 1959 between John C. Hodges and the UT Libraries was proposed by him, for surely no librarian anywhere would seriously entertain such an idea, much less suggest it, that a soon-to-retire professor might enjoy spending some time in the library, say six or seven hours a day, devising promotions for library support, including writing reports, letters, news releases, articles, and setting up the proper records and procedures for the receipt of gifts, these chores to be interspersed by trips across the State (at his own expense) in search of business men, banks, philanthropists, and owners of private libraries who might be persuaded to give their money or books to the University. In addition, he himself would donate thousands of dollars over the years in matching funds, endowments, memorial and special gifts.

John C. Hodges did all these things for the UT libraries, and more, in what he probably thought of as "spare time" between revisions of the Harbrace Handbook, trips abroad, preparation and publication of his book of Congreve's letters, participation in business, civic, church, social, and personal interests, including involvement as trustee or alumnus of other colleges and universities. It may have been spare time to him, but to the library staff in Knoxville it was an exciting and productive time, and he is now sadly missed. That his death on July 7, 1967, came only weeks before the actuality of the millionth volume, one of his goals, was less ironic than it would seem, for he had dismissed that goal as won and was planning campaigns for the second million.

The John C. Hodges Alumni Library Endowment, begun in 1964 by friends and colleagues to do him honor, was after his death subscribed to by alumni and friends as a memorial, its proceeds to be used for books in all fields. Funds for John C. Hodges Library Endowment were bequeathed by him for the purchase of books relating to English language and literature. John said many times that one mark of a great university is an excellent library, and it was his pleasure to help achieve that excellence for UT. It is altogether appropriate that the

library now being completed on the Knoxville campus should be named, as it was on October 27 by action of the Board of Trustees, the John C. Hodges Undergraduate Library.

The John C. Hodges Undergraduate Library

Construction began in October 1967 on the undergraduate library, located on the property once occupied by the University Faculty Club at the corner of Volunteer Boulevard and Rose Avenue. The building will be in service in the spring of 1969, and will contain 100,000 square feet, seat 1,600 readers and house 180,000 volumes in the initial structure. Extended services will be offered undergraduates, including a large after-hours study area which can be kept open through the night if necessary, either during examination or regular schedule.

The undergraduate library, either a part of the general library or a separate structure, has become a fact of the educational life, mainly because the undergraduate was being slighted, though unintentionally, in favor of the scholar and research man. Graduate students and research workers have a right to find study and work facilities in the library of their chosen school as well as in the laboratory. On the other hand, the undergraduate must be equally served.

In the mid-fifties a nation-wide trend of increased library use was attributed to growing emphasis by faculty on the library as a teaching instrument, to higher standards for matriculation and, particularly, to lack of study space on campuses. Whatever the reasons, the result was critical competition between the undergraduate and the graduate for library seats and library services. Our graduate school was, and is, one of the fastest growing in the South, and our undergraduate enrollment was increasing almost unbelievably.

Campus planners were alerted to the need for an undergraduate library in 1950. Plans for an addition to Main were programmed in 1955, and an undergraduate area was included. In 1959 the Undergraduate Library was in use, housing 8,000 books and seating 250 students. Projected adequacy was for at least eight years, with expected acquisition of approximately 50,000 books. When the eight years had passed, almost 60,000 books were contained in that room and extra reader stations had been crowded into it.

The present undergraduate unit has more than fulfilled the purposes it was planned for. There was an immediate increase in library use, but, unexpectedly, there was no decrease in recorded circulation at the general collection loan desk or in any of the branch libraries. The undergraduate now

has access to an open-shelf collection selected strictly to reach his needs and inclinations. He is able to study in a comfortable and attractive book-oriented atmosphere, which is what the University Administration desires for its undergraduate students. Service to him has widened significantly and is administered by staff who are concerned solely with his needs. The general collection, of course, is available to him at any time. The separately housed undergraduate library will bring even more effectiveness to the educational processes for the undergraduate on this campus.

The Paul Meek Library

The new library on the UT campus at Martin was dedicated on Monday, May 6, 1968, and named to honor Paul Meek, head of the Martin Branch from 1934 to 1967, an educator and administrator who has always shown an awareness of the library's role in academic excellence. The building employs many new developments in library planning. It is attractive and comfortable, with air conditioning, thermal glass, sound-proof study rooms, and color used with imagination and taste. Reader stations, both lounge study centers and individual study tables, are interspersed among the book stacks.

Miss Mary Ellis Hall, Librarian, reports that the availability of listening and viewing rooms is stimulating accelerated additions of discs, tapes, and forms of microfiche for use on circulating and non-circulating audio-visual equipment; the recent decision to offer the master's degree in education has prompted support for library materials in that field. Miss Hall has asked that her gratitude to the Knoxville library staff members who assisted with the planning and programming of the building be officially acknowledged.

Library Operation

In the routine procedures of librarianship, progress was evident in all areas. State wide, the circulation of books increased 7.7 per cent; total library support rose 17 per cent; reference service, interlibrary loans, and addition of materials advanced 25 per cent respectively over fiscal 1967.

Use and Service

Recorded Circulation of Materials: In Knoxville 522,685 books were circulated, a total campus increase of 5 per cent. Unusual activity was recorded in the Engineering Library, with a rise of 37 per cent; Biology 18 per cent; Education 14 per cent; Science 9 per cent; and the Main Library Loan Desk 5 per cent.

The Space Institute at Tullahoma recorded an increase of 119 per cent; Martin 21 per cent; Memphis 10 per cent; and the Nashville Center 13 per cent.

Recorded Reference Service: The librarians across the State answered 6,732 more reference questions than in 1967, with Knoxville showing a rise of 33 per cent and Memphis 30 per cent. It must be noted that since some of the libraries do not record reference answers, the chart on page 6 reflects only partial reference activity.

Answers by the Main Library Reference Department increased 46 per cent and substantial increases were reported in the branch libraries, which could

indicate more accurate tabulation, increased enrollment, growth of personal assistance to library users, or it could reflect another facet of the new breed of student, since not too long ago students hesitated to "bother" the library staff with questions. In attempts to overcome this reticence, we locate Reference personnel in readily approachable areas away from enclosures or counters which might form barriers to service, and endeavor to recruit as staff persons who really like to help people. We have been fortunate in having as the head of our Reference Department one of the best reference librarians in the profession, Miss Eleanor Goehring, who over the years has given her staff, outside of working hours, informal and intensive instruction in reference philosophy as well as use of reference tools, meanwhile showing them, in the day-to-day performance of duties, a pattern of excellence in librarianship.

Interlibrary Cooperation: In fiscal 1968, the University libraries lent 14,611 volumes to other libraries as against 11,709 last year, and borrowed 115 fewer from other sources, reflecting the institution's climb toward true research status and progress in improvement of collections to support its programs. Loans of books to other libraries is one of UT's activities in advancement of state, regional, and national educational growth by the sharing of resources and knowledge.

In October of 1967 a refinement of interlibrary cooperation was introduced to area colleges and universities by way of direct loans to meet individual needs of their faculty, when more feasible than regular interlibrary loans, to the extent it could be accomplished without damage to the library situation of UT's students and faculty. This offer has been extensively accepted by the schools in Knoxville and East Tennessee.

Automation: The library has not yet put into operation any program involving automated systems, although during the past years various members of the staff have attended automation conferences and institutes, visited libraries using these techniques, and followed the literature in the field. Specific applications of computer techniques were discussed with systems analysts and coordinated with appropriate campus personnel, with the intention of automating certain library operations as soon as procedures were fully refined.

The automation unit, set up and staffed in fiscal 1968, began preparing the undergraduate collection for automated operations in the new building. Research to determine the most effective equipment continued. Reports made by the automationist were reviewed by the library administration and the Automation Committee at regular intervals.

The Problem of Space

One year ago the libraries on the Knoxville campus could accommodate 2,021 readers, or 11.21 per cent of the official enrollment; in 1968 only 10.6 per cent could be seated, despite an overall gain of seventy-one reader stations during the year. The percentage has been dropping for many years, but the Undergraduate Library's 1,600 seats will undoubtedly raise it somewhat, though not to the minimum American Library Association standard of 25 per cent.

Moving the undergraduate collection out of Main will, in addition, make available space for growth of the general collection perhaps until 1973. There is critical need for space in branch libraries, too, both for readers and books, especially in Engineering, Biology, and Science. Book and reader capacity will be substantially increased by the inclusion of a science-technology library in the building planned for science, engineering, and biology.

The Agriculture Library, moving from its life-time quarters in 218 Morgan Hall to the area released by Plant Sciences, gained 4,800 square feet of floor space and 51 reader stations. The move, planned and carried out by Robert E. Harrison, Assistant to the Director, was accomplished with dispatch during the December 1966 holidays. The new quarters are in good refinished condition, with central heating and air conditioning and a combination of natural

and artificial light which meets the illumination standards of the American Library Association.

The Main Library needs additional faculty studies, seminar rooms, and work space for technical services. An unavoidable encroachment upon reader/book space was made by moving Periodicals and Serials from the highly overcrowded Acquisitions Department into 528 square feet adjoining the stacks.

Staff Activities

The Mary E. Baker Scholarship, a $1,000 grant subscribed by the Knoxville library staff, was awarded to Barbara Minge, Reference assistant, who was accepted by the Graduate School of Library Science at the University of Illinois.

Donations of $450, plus matching funds from John C. Hodges, increased the Library Staff Endowment Fund, a total staff participation in the Library Development Program, to $3,437.09.

Library Lecture No. 20, "Twentieth Century Scholarship in the Research Library: A Marriage of Convenience," was delivered on May 7 by John H. Berthel, Librarian of Johns Hopkins University.

There were three promotions in rank from instructor to assistant professor: Mary Frances Crawford, Undergraduate Reference Librarian; Alice M. Nicholls, Education Librarian; Don W. Jett, Science Librarian. Aubrey H. Mitchell, Agriculture Librarian, was promoted to instructor from professional assistant; Helen Bean, Processing Department, and M. Sugg Carter, Circulation Department, were advanced to professional library assistants with academic rank.

Publications in professional journals were "Professional Staff Opportunities for Study and Research," by William H. Jesse and Ann E. Mitchell, Assistant Reference Librarian, in College and Research Libraries and "A Catalogue of Misfortunes," by Jesse C. Mills, Undergraduate Librarian, in Library Journal. Thomas T. Rogero, Engineering Librarian, continued as editor of Radiations for the Appalachian Chapter of the Special Libraries Association, and Lillian Kramer, Acquisition Department, edited the 7th Library Development Report (The University of Tennessee Record, Volume 70, Issue 5). Olive H. Branch, Jesse C. Mills, and John H. Dobson, Special Collections Librarian, each participated on Faculty Platform broadcasts, a program of the Division of University Extension which is carried on 55 radio stations throughout the State.

Staff travel was done for information and study, attendance at professional association meetings and academic functions of other universities, and assistance to other colleges and universities, either individually or as a part of a visitation team. Don Jett, Science Librarian, spent three months in Bangalore, Mysore State, India, as Library Development Consultant at the University of Agricultural Sciences there. Olive H. Branch, Acquisition Librarian, Jesse C. Mills, Undergraduate Librarian, and Gene M. Abel, Assistant Director, served on visitation committees for the Southern Association of Colleges and Schools. Robert Bassett, Assistant Acquisition Librarian, participated in a comprehensive study of Livingston State College (Alabama) being conducted by the University of Tennessee for the projection of plans for continuing development of the school. Jesse C. Mills, who helped to plan the award-winning University of Pennsylvania Library during his tenure there, advised High Point College in North Carolina on library building plans.

Various staff members held office in the following professional associations, took part in conferences, committee assignments, and workshops, and attended the regular meetings: American Library Association, Special Libraries Association, Tennessee Library Association, Southeastern Library Association, Association of Southeastern Research Libraries, Association of Research Libraries, Tennessee Education Association, and Tennessee's first Governor's Conference on Libraries. This latter was held in Nashville and was attended by approximately 1,200 business and civic leaders and librarians from throughout the State. Olive H. Branch, Acquisition Librarian, represented the UT Library.

Resources

Gifts received through the Library Development Program were 4,674 books and $90,800, making the 8-year total of the program's activities $443,787 and 44,874 books. A detailed report of this year's accomplishment is to be found in Volume 71, Issue 6, of The University of Tennessee Record. Some gifts of such importance as to command note here are the John C. Hodges collection of the works of William Congreve, the Herbert E. Copeland estate library, the Stanley P. Johnson gift, the Charles P. White collection, the Horace Maynard papers, given by Mrs. Robert Lindsay for the Special Collections Library, and additions to the Smiley Blanton collection. A total of 15,285 manuscripts were added to Special Collections.

Expenditures for books, periodicals, and binding increased around $120,000 over fiscal 1967; approximately 20,000 more books were added and more than 600 new periodical titles were received. The following list of notable acquisitions is a selective one, and necessarily so. It is hoped that one aspect of automated operations mentioned earlier will allow more frequent and more complete information to the faculty on current acquisitions.
